Welcome to Blossoming Minds Academy

Our academy offers classes and tutoring services in Chicagoland area for children from 12 months to 14 years of age. We incorporate pre-school and after-school learning. Unlike other learning centers that rely on conventional academic methods, we use diverse curricula and various teaching techniques. Our instructors adopt teaching practices of famous European theorists, philosophers, mathematicians, poets, musicians, and artists to a modern-day student.

Our unique educational method is Game-Based Learning in a Small Group environment.

At our educational learning center, children achieve specific learning goals through constant involvement in interactive entertainment and consistent individual attention of teachers. Age specific games, artistic demonstrations, melodic rhythms, and simulations engage kids in a fun-filled and relaxing atmosphere. Such classroom assignments encode reasoning and decision-making behaviors, thus allowing students to learn faster and to remember better.

Advancing child's intellectual is an independent Russian-based educational tutoring center founded in 2010. Blossoming Minds Academy was formed to give our children an opportunity to get ahead at the very early age by getting the best early education, maintaining their Russian heritage, and befriending other Russian speaking children of their age in North Shore Chicago.
